

PRE-STERILIZED AND READY TO USE

Pain Management Single-Use Probe

STERILE

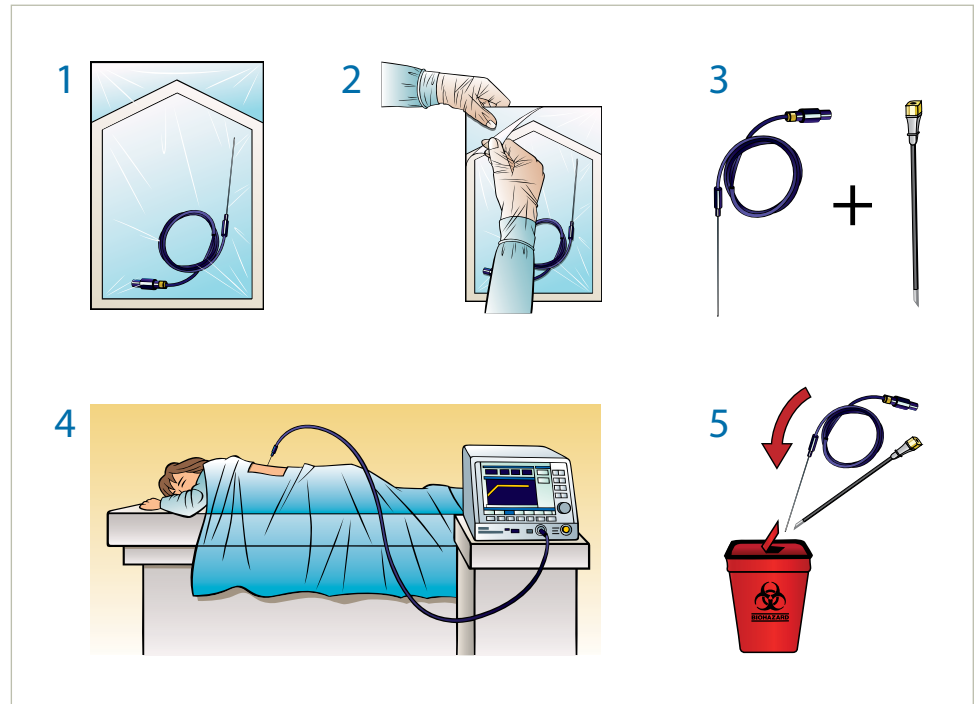

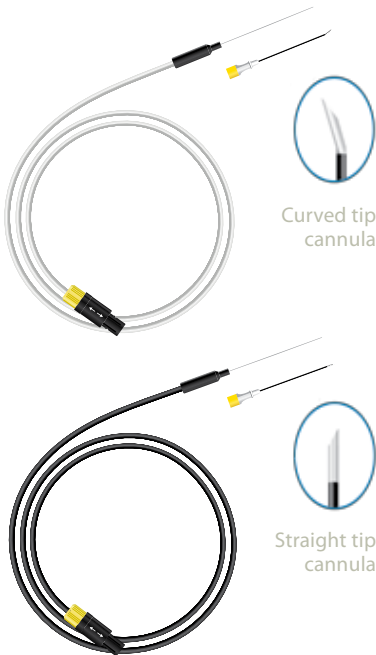

Pain Management Single-Use Probe

The Single-Use Probe is supplied sterile and ready to use. The Single-Use Probe is designed to be used in combination with the Baylis disposable cannula.

- ▶ One-time use improves infection control by helping to prevent cross contamination
- ▶ Excellent choice for facilities without sterilization capabilities
- ▶ Ideal to keep in reserve for emergencies

How to use

Features

- 1 Pre-sterilized, ready to use
- 2 Disposable
- 3 Available in a variety of sizes
- 4 Color coded for easy identification, so that the probe and cannula can be matched appropriately

The Single-Use Probe connects to the Baylis Pain Management Generator using a four foot long connector cable. The extended length of the connector cable ensures that it is outside the sterile field, maximizing protection.
