

SEE THE DIFFERENCE WITH THE

Baylis RF *RadiOpaque*[™] Cannula

The *RadiOpaque*[™] cannula provides better visualization during positioning, resulting in a better targeted treatment.

Platinum adds value

RadiOpaque™ Cannula

The *RadiOpaque™* cannula features a platinum band located at the distal end of the active tip. This defines the actual lesion location under fluoroscopy. The *RadiOpaque™* cannula provides better visualization during positioning, resulting in a better targeted treatment.
